# SOLUTIONS TO STORMWATER POLLUTION

## *Easy Things You Can Do Every Day To Protect Our Water*

### A Guide to Healthy Habits for Cleaner Water

Pollution on streets, parking lots and lawns is washed by rain into storm drains, then directly to our drinking water supplies and the ocean and lakes our children play in. Fertilizer, oil, pesticides, detergents, pet waste, grass clippings: You name it and it ends up in our water.

Stormwater pollution is one of New Jersey's greatest threats to clean and plentiful water, and that's why we're all doing something about it.

By sharing the responsibility and making small, easy changes in our daily lives, we can keep common pollutants out of stormwater. It all adds up to cleaner water, and it saves the high cost of cleaning up once it's dirty.

As part of New Jersey's initiative to keep our water clean and plentiful and to meet federal requirements, many municipalities and other public agencies including colleges and military bases must adopt ordinances or other rules prohibiting various activities that contribute to stormwater pollution.

**Breaking these rules can result in fines or other penalties.**

As a resident, business, or other member of the New Jersey community, it is important to know these easy things you can do every day to protect our water.

#### **Limit your use of fertilizers and pesticides.**

- Do a soil test to see if you need fertilizer.
- Do not apply fertilizers if heavy rain is predicted.
- Look into alternatives for pesticides.
- Maintain a small lawn and keep the rest of your property or yard in a natural state with trees and other native vegetation that requires little or no fertilizer.
- If you use fertilizers and pesticides, follow the instructions on the label on how to correctly apply it.

Make sure you properly store or discard any unused portions.

#### **Properly use and dispose of hazardous products.**

- Hazardous products include some household or commercial cleaning products, lawn and garden care products, motor oil, antifreeze, and paints.
- Do not pour any hazardous products down a storm drain because storm drains are usually connected to local waterbodies and the water is not treated.
- If you have hazardous products in your home or workplace, make sure you store or dispose of them properly. Read the label for guidance.
- Recycle used motor oil.
- Contact your municipality, county, or facility management office for the locations of hazardous waste disposal facilities.

## Keep Pollution Out of Storm Drains

- Many new storm drain inlets throughout the Borough include messages reminding people that storm drains are connected to local waterbodies.
- Do not let sewage or other wastes flow into a stormwater system.

## Don't Feed Wildlife

- Do not feed wildlife, such as ducks and geese, in public areas.
- Section 38-38 of the Borough Code prohibits wildlife feeding on public property.

## Don't Litter

- Place litter in trash receptacles.
- Recycle. Recycle. Recycle
- Participate in community cleanups.

## Clean up after your pet

- North Caldwell has enacted and will enforce local pet-waste rules.
- An example is requiring pet owners or their keepers to pick up and properly dispose of pet waste dropped on public or other people's property.
- Please visit the Borough's website to review Section 53-10 of the Borough Code and comply. It's the law.

### Remember to:

- Use newspaper, bags, or pooper scoopers to pick up waste.
- Dispose of the wrapped pet waste in the trash or unwrapped in a toilet.
- Never discard pet waste in a storm drain.

## Dispose of yard waste properly

- Keep leaves and grass out of storm drains.
- If your municipality or agency has yard waste collection rules, follow them.
- Use leaves and grass clippings as a resource for compost.
- Use a mulching mower that recycles grass clippings into the lawn.
